Your Comments:

Dear EPA,

I am a Portland resident living in the Willamette River Watershed only a few miles from the Superfund site. The draft cleanup plan is not adequate to restore the Willamette River Superfund area. I am in agreement with the Audubon Society of Portland that at least 1,000 acres of polluted sediment be removed from the river as part of the plan. The Cleanup Plan must result in the removal of the Fish Consumption Advisory so that eating fish from the Lower Willamette is just as safe as eating fish from anywhere else in the Willamette River System and this must occur within a 10-20 year time frame.

Furthermore, toxic dredged sediments must be taken to an appropriate landfill. I urge you to amend your plan to include these key provisions.

This will be the only real path forward to ensure the health of our communities, our environment and our wildlife.

Sincerely (b) (6)
